**DETAILED ACTION**

***Response to Amendment***

1. Amendments to claims 1-7, 9-14, 16-32, 34-44, and 46-48 have been entered in the above identified application. **Claims 1-48 are pending of which claims 8, 15, 33, and 45 have been withdrawn from consideration.**

***Claim Rejections - 35 USC § 112***

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 1-7, 9-14, 16-32, 34-44, and 46-48 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter, which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Claims 1-7, 9-14, 16-32, 34-44, and 46-48 have been amended to replace the phrase "a resin sheet containing dispersed particles" with "a liquid crystal cell substrate". However there is no support for such an amendment in the original disclosure. The Applicants direct the Examiner's attention to Page 3, the 2<sup>nd</sup> full paragraph as support for such an amendment however the Examiner would like to point out that this paragraph only describes the

problems associated with prior art epoxy resin substrate for liquid crystal displays. There is no disclosure to support the amendment that the disclosed resin sheets of the instant invention can be used as liquid crystal cell substrates. Liquid crystal cell substrates are specific members of a liquid crystal cell and not simply another layer in a liquid crystal cell, in other words, the preamble "liquid crystal cell substrate" provides a certain structure to the subsequently recited resin layer and the original disclosure of the instant application does not provide support for such a structure.

Applicants are required to cancel the new matter in the reply to this Office action. Upon cancellation of the new matter, the prior art rejections set forth in the previous Office Action may be reapplied.

### ***Conclusion***

3. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any

Art Unit: 1773

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
